

Portable diesel driven FWP set

Headquartered in Galveston, T&T offers a wide range of maritime services and emergency response solutions. With operational bases in the Americas, Europe and Asia, they operate a broad range of emergency response equipment. The equipment is packaged in such a way that it can easily be transported by air, land or sea. For her Fire Fighting activities, T&T was looking for fire water pump sets that could meet the tough demands that equipment faces in this challenging industry. For this project, Fischcon delivered two lightweight portable fire water pump sets that can fight fires up till 80 meters with two fire water monitors.

Project	Hellbeater
Operator / End user	T&T Marine Salvage, Inc.
Location	Galveston, US
Capacity	600 m ³ /h @ 13 bar / 2.650 USGM @ 190 Psi
