

Stationary FWP Sets

Sweden's oldest refinery, the Nynäshamn refinery of Swedish company Nynas AB, produces naphthenic specialty products and bitumen with an installed capacity of 90.000 barrels per day. For their/her existing fire main ring Nynas had to replace the existing fire water pump sets to meet the latest standards in fire protection. For this project Fischcon has delivered four (4) vertical turbine fire water pumps, driven, via an angled gearbox, by a dedicated fire pump diesel engine.

Project	Nynas
Operator / End user	Nynas AB
Location	Nynäshamn refinery – Sweden
Capacity	4x 1.125 m ³ /h @ 140 mwg
Scope of supply	<ul style="list-style-type: none">• 4x Diesel driven fire water pump set, incl. auto start control panels• 2x Jockey pump• 1x Temporary enclosure and pontoon• 2x Fuel system with dedicated tank• Installation and commissioning on site
